

HOW TO USE THIS GUIDE TO DETERMINE YOUR RING SIZE

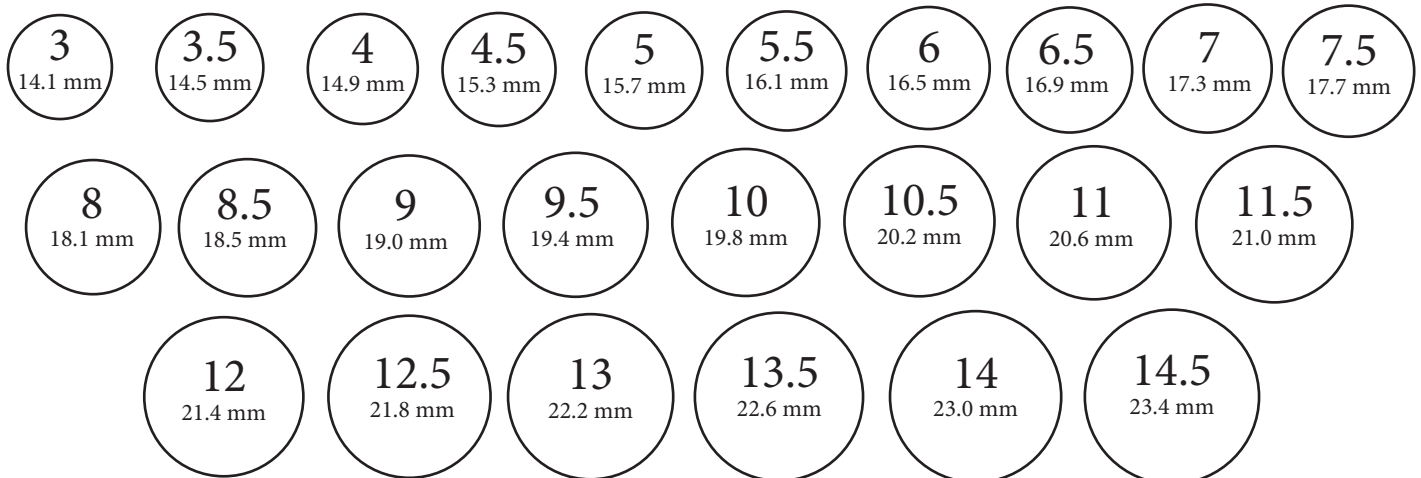

- Make sure to print this guide with paper scaling set to "100%". Please use ruler to verify the scale by measuring above boxed area.
- Measure your finger at the time of the day when it will be at its largest - This is usually at the end of the day.
- Avoid measuring your fingers when they are cold or damp, as they will be at their smallest.
- Bands or rings over 5mm in width may fit your finger more tightly than narrow rings of the same size.

USING THIS GUIDE WITH RING CIRCLES

1. Choose one of the rings that fits well on her ring finger.
2. Lay her ring over a circle that is closest to the size of her ring.
3. Find the circle that fills the entire inner-circle of her ring. For accuracy, no part of the circle should be visible outside the ring when viewed from above.
4. If the size of the ring seems to fall between two sizes, order the larger ring size.

Measure with her favorite ring

WHAT IF IT DOES NOT FIT PERFECTLY AFTER YOU HAVE ORDERED?

If the ring does not fit perfectly, we offer a 60 day free resizing from its original purchase date. To take advantage of your free re-sizing, contact 877.766.2757 for customer support.

* Please note that certain rings such as eternity bands or tension rings do not qualify for re-sizing. Make sure to order these rings with proper size during the initial purchase. Contact us for more info if needed.
